PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Excel, Python, and Tableau for data analysis, cleaning, visualization, reporting, and dashboard development. Skilled in identifying trends, improving data quality, and communicating insights to stakeholders. Reduced inventory discrepancies by 30% across 10,000+ products and developed machine learning models for fraud detection and customer engagement analysis. AWS Certified Cloud Practitioner with experience in cloud-based data workflows.

TECHNICAL SKILLS

Analytics Tools: SQL, Python, Excel, Google Sheets, Tableau, Pandas, Numpy, Matplotlib
Data Analysis Methods: Data cleaning, validation, exploratory analysis, trend analysis, reporting, dashboarding, stakeholder communication, KPI tracking
Tools & Collaboration: VS Code, Git, GitHub, AWS Cloud Services, Jupyter Notebook

PROJECTS

Small Business Analytics Hackathon Project — Winning Team, May 2026

- Analyzed small business (*Vitality Bowls Stamford*) operational and customer data to identify key performance gaps, growth opportunities, and actionable recommendations for the business owner.
- Built data-driven insights and presented findings through a clear business solution, contributing to a winning project outcome among participating teams.
- Collaborated with a cross-functional team under time constraints to translate raw business information into practical recommendations that supported decision-making.

Facebook Post Engagement Analysis

- Analyzed 499 Facebook post records for a cosmetics brand to identify engagement trends, posting patterns, and factors influencing customer interaction.
- Built and compared Linear Regression, Ridge, and Lasso models using Python, feature engineering, and train/test validation across 399 training rows and 100 test rows.
- Identified optimal posting time windows and engagement drivers, translating exploratory data analysis into actionable recommendations for content planning and audience engagement.

Financial Fraud Detection Analysis

- Analyzed a large-scale financial transaction dataset of 6.3M+ records to identify high-risk transaction patterns, improve fraud detection, and support data-driven risk analysis.
- Built and evaluated classification models using Python, achieving a 0.879 F1 score with Random Forest and improving Gradient Boosting performance from 0.648 to 0.712 F1 through hyperparameter tuning.
- Applied data cleaning, feature engineering, class imbalance handling, confusion matrix analysis, and precision/recall evaluation to improve model reliability for rare fraud detection cases.

PROFESSIONAL EXPERIENCE

Inventory & Data Operations Supervisor | Staples, Inc.

Jul 2023 - May 2026

- Managed and audited inventory data for 10,000+ products, ensuring data accuracy and supporting operational decisions through recurring reports and ad hoc analysis.
- Analyzed inventory trends and discrepancies, contributing to a 30% reduction in inventory errors.
- Leveraged data insights and cross-functional collaboration to optimize stock flow, improve workflows, and support double-digit sales growth.

Technology Fellowship - Data Analytics Track | The Knowledge House

Jan 2026 – Present

- Analyzed datasets using SQL, Python, Excel, and visualization tools to identify trends and deliver actionable business insights.
- Cleaned, transformed, and validated data to improve quality and build reports/dashboards for diverse stakeholders.
- Applied exploratory analysis, business context, and statistical thinking to support reporting and data-driven presentations.

Customer Development Executive | Unilab, Inc.

Jul 2014 – Aug 2022

- Analyzed sales performance, customer purchasing trends, and account-level business metrics across key retail partners, consistently achieving 100%+ of annual sales goals from 2018–2022.
- Prepared data-driven business reviews, performance reports, and action plans that supported account growth, operational improvements, and stakeholder decision-making.
- Recognized as Best Account Manager for three consecutive years for using relationship management, business analysis, and data-informed planning to grow client accounts.

CERTIFICATIONS

- Google Data Analytics Certificate** - Coursera, Jul 2023
- AWS Certified Cloud Practitioner** - Amazon Web Services, Jul 2025

EDUCATION

- Bachelor of Science in Business Administration** | De La Salle University – Dasmariñas | Apr 2013
 - Outstanding Business and Operations Management Student
